

Units Action Filter

Overview

The **Units Action Filter** lets you monitor and filter all actions taken on units across the sales pipeline — from View to Client through to Delivery.

Units	Actions
Name : Test Details : Golden Building Segment : Test Building : A Project : Test Client : Test	Action : unblock-unit Date action was created : 2026-06-24 12:56:30 Salesman : Admin
Name : AB2-G0-1 Details : AB2-G0-1 Building Segment : Phase 1 Building : B1 Project : Illume Residence Client : يوسف البراهيم	Action : Hold Date action was created : 2026-06-24 12:50:55 Salesman : Admin

What You Can See

- Which units have been shown, held, reserved, contracted, or delivered.
- Who took the action and when.
- Current pipeline stage of each unit.

Key Things to Know

- Use this tab to get a quick overview of where each unit stands in the sales pipeline.

- Useful for operations and management to track the full lifecycle of each unit.
 - Supports filtering by project, building, segment, salesman, date range, and pipeline stage.
